Rodger,

I'm very sympathetic to anyone who wants to bring an FB7 back to life. =20

I have four coil forms made by James Fred, Antique Radio Labs in Cutler, =
Indiana that I haven't used in years, so I probably won't use them now. =
They were intended for the SW-3, so they will fit into the FB7 as well. =
The only problem is that they don't have the metal end caps that are =
used on the FB7 coils. You could probably rig some end caps from sheet =
metal and hardware store parts. =20

I also have a matched pair of FB7 "A" coils that I just recently =
acquired. They cover 11.4 to 19.5 mc. I haven't even plugged them in =
to my receiver to see if they work, but they look OK. =20

If you are interested in any of this stuff, let me know.

Jim Hanlon, W8KGI

Subject: National Coils/forms needed

Hi all,

I am looking for some 6 pin coil forms to bring a National FB-7 back =
to=20

life. Coils or coil forms would be nice but any hints on making the 6 =
pin coil base are also welcome.

Unfortunately the 6 pin base is specific to National coils and is not=20
the same as a 6 pin tube base.

Rodger WQ9E

You could say the same thing about fielding a NASCAR vehicle, flying a
plane, restoring an antique car, rebuilding a 1950's boatanchor, etc.

They do it because they CAN!

So what? I think it's awesome. So are the other 6 towers on site. So is their
virtual reality remote control. These guys do technical and engineering
magic, and amateur radio allows them the forum and legal means to do it.

Of course it's over the top but it's their passion and they're doing what
few have ever done.

FWIW....

Yup, and all the while moving Amateur radio technology forward.
I see no problem in this, whatsoever. It's a club station, so
they can probably afford it. IMHO the only people complaining are the
envious, the jealous, and the spoil-sport curmudgeons who just have to
complain about something!

Personally, I think it's a thing of beauty!

Hello Gang,

It's been a long time since Ive been on this list.

Jack let me back on with an exchange of a few Greckles.

Monitored the mail and saw a few names I remembered from the mid 90's.

I will be posting as time go's by with a few questions on my NC-300 and the old DX-100.

Great to be back....

Your Friend Al

in sunny Houston.

Folks,

I helped pack up the library of SK Jim Maxwell, W6CF, and he lived on top of a
1000 ft mountain between Santa Cruz and San Jose, CA. On a clear day, you could
see nearly 100 miles in several directions.

His antenna was a rotatable beam on a 25 foot tower.

As the realtors say, "Location rules."

My own situation is less good. I'm at the bottom of a several hundred foot
mountain, facing east. This was great when the BBC transmitter I wanted to hear
was in the Caribbean, and the rest were in Europe. Nowadays, I'm trying to hear
Thailand and Singapore, and I'm on the wrong side of the hill.

Peace,

Scott

Forget the cost. Just think of the environmental impact---all those nearby
elk will probably be sterile in the mating season.

Hello Everyone,

For those who may not be aware....

Three years ago, the Authors Guild, the Association of American Publishers =
and a handful of authors and publishers filed a class action lawsuit agains=
t Google Book Search.=20

Google is now delighted to announce that they have settled that lawsuit and= will be working closely with these industry partners to bring even more of= the world's books online. It will take some time for this agreement to be = approved and finalized by the Court, however feel free to see what=E2=80=99= s available so far: <http://books.google.com/>

There are many electronics titles in the pool of books.=20

Can ICs be of interest to boatanchor people?
I have a double handfull of 7400 series ICs that I'd like to pass on to
someone for postage.

Any interest??

Wilson

Under Bush administration proposed EPA regulations that Obama has just nullified 7400 series IC's are considered to be not "green" and therefore are beneficial to the oil and gas industries. In order to help your local suffering fossil fuel dynasty member please avoid use of such energy efficient technology and revert to processing all of your digital tasks with vacuum tubes. Join the "Let's Get Hot" campaign and help ensure our don't-give-a-damn future.

Anyone know what the "standard" thread is, that's found on mic stands (and of course, microphone heads themselves)?

Thanks
John

John....

The most common thread is 5/8"-27.

The thread is 5/8-27. That's 5/8 inch diameter, 27 threads per inch.
